EARLY MATURITY VARIETIES

MAIZE PORTFOLIO 2026

Variety	FAO	Growing Area	Early Vigour	Yield of Controls	Starch Content	ME Level	Standing Power	Use	Treatment	Pack Size
 KWS - TEMPRANO KWS Temprano is an ultra-early maize delivering class-leading dry matter (16.6 t/ha) and high starch (36.5%) yields. With superb early vigour (6.8) and rapid dry-down, it's ideal for short-season windows and less favourable sites. Highly suited to diets with under 50% maize inclusion, Temprano ensures reliable performance and early harvest across challenging conditions.	150	Less Fav	6.8	94	36.5	11.76	7.2	Forage	Redigo M & Korit	50,000 Seeds
  GRAINSEED - FAITH FAITH is an ultra-early, high-yielding maize with excellent vigour, strong roots and a robust, large-cob plant type. Suited to medium and heavy soils, it delivers early starch lay-down, fast dry-down and reliable early harvests. With high energy output, strong digestibility and dependable performance even in tough conditions.	170	Fav/ Less Fav	7.3/7.2	102/104	34.8/35.5	11.61/ 11.54	7.8	Forage/AD	Redigo M & Korit	50,000 Seeds
  LIMAGRAIN - FOXTROT Foxtrot is a very early, high-quality maize with excellent dry matter and ME yields. Quick to establish and smooth to mature, it offers superb starch performance and strong digestibility. With good early vigour and outstanding results under plastic, Foxtrot suits both favourable and challenging sites, delivering one of the highest starch yields available for early harvesting.	170	Fav/ Less Fav	7.2/7	103/102	35.1/35.4	11.76/ 11.75	6.7/6.2	Forage/AD	Redigo M & Korit	50,000 Seeds
	FAO	Growing Area		End Use		Early Vigour		Stover Dry Down Rate		Pack Size
N/A PIONEER - P7179 P7179 is an extra-early flint maize hybrid, ideal for less favourable sites or where an early harvest is required. Delivering high dry matter (39.4% on favourable, 37.8% on less favourable sites) and excellent starch content, it shows consistent ear development, strong eyespot resistance (PACTS 8.0), and high biogas potential, producing over five million litres per hectare.	170	Fav/ Less Fav		Forage/AD/Grain		Good		Very Fast		50,000 Seeds

MEDIUM MATURITY VARIETIES

MAIZE PORTFOLIO 2026

Variety	FAO	Growing Area	Early Vigour	Yield of Controls	Starch Content	ME Level	Standing Power	Use	Treatment	Pack Size
 LIMAGRAIN - PINNACLE Pinnacle delivers maximum starch yield and excellent cell wall digestibility for high energy output and strong feeding performance. Its early vigour and rapid growth support early flowering and well-developed, high-starch cobs. With good Eyespot tolerance and strong plant health through to harvest, Pinnacle enables early cutting and consistently high-quality forage.	180	Fav/Less Fav	7/6.8	98/100	35.7/36.2	11.71/11.70	7.4/7.1	Forage/AD /Grain	Redigo M & Korit	50,000 Seeds
 KWS - ANASTASIO KWS Anastasio (FAO 180/190) is a versatile maincrop hybrid delivering leading dry matter yields and high starch content for forage, CCM, grain or biogas. With strong early vigour and rapid establishment on all soil types, it offers excellent energy levels and harvest flexibility. Anastasio reliably fills clamps and supports high-performance rations across multiple cropping systems.	180/190	Fav	7.1	103	33.2	11.52	7.7	Forage/AD /Grain	Redigo M & Korit	50,000 Seeds
 DSV - LIKEIT A high-yielding, versatile maize variety with rapid early vigour, excellent standing power, and strong disease tolerance including fusarium and eyespot, it produces large, fully enclosed cobs with high starch content. Its robust growth and consistent performance make it an ideal all-round, early-maturing hybrid.	190	Fav/ Less Fav	6.9	96	33.6/35.2	11.56/11.53	8.1/8.2	Forage/AD /Grain	Redigo M & Korit	50,000 Seeds
 KWS - PAPAGENO Delivers excellent dry matter yields, with an exceptionally balanced starch content that supports high maize inclusion rates in rations. Its impressive energy content enhances animal performance, while high early vigor ensures robust establishment. Versatile in its applications, it is suitable for silage, grain, and biogas production, making it an ideal choice for spreading drilling and harvest timings efficiently.	190	Fav	6.7	104	33	11.6	7.3	Forage/AD /Grain	Redigo M & Korit	50,000 Seeds
 GRAINSEED - ES CONSTANCE This robust FAO 190 variety is highly consistent across varied soil types, delivering exceptional cob set and high-quality silage. With large, erect indeterminate cobs, high starch and ME content, and strong cell wall digestibility, it suits both forage and early crimped grain production. Vigorous, tall plants offer excellent lodging and eyespot resistance, maximizing yield potential under all conditions.	190	Fav/Less Fav	7.3	102	33.5	11.6	8.2	Forage/ Grain	Redigo M & Korit	50,000 Seeds

LATE MATURITY VARIETIES

MAIZE PORTFOLIO 2026

Variety	FAO	Growing Area	Early Vigour	Yield of Controls	Starch Content	ME Level	Standing Power	Use	Treatment	Pack Size
 KWS - GRANTURISMO With an impressively high yield, this variety boasts exceptional AD credentials thanks to massive yields. Its balanced starch content supports the highest inclusion rates in ruminant rations, while super early vigor ensures strong establishment. Ideal for early sowing and later harvest, it performs particularly well on lighter soils.	220	Fav	6.9	107	28.4	11.24	8	Forage/AD	Redigo M & Korit	50,000 Seeds
 GRAINSEED - MICHELEEN Superb, high-yielding maize with excellent drought tolerance, strong early vigour, and a long harvest window. Producing large, tapered cobs with high starch and ME content, it performs exceptionally on light, sandy soils and top sites. Tall, erect plants with good digestibility make it ideal for both forage and grain production.	220	Very Fav	7.5	106	30.3	11.24	7.5	Forage/ Grain	RedigoM & Korit	50,000 Seeds
NEW LIMAGRAIN - LG31160 An early-maturing grain maize hybrid delivering high yields with very low moisture content. Large, good-coloured kernels and strong early vigour, it is suited to both favourable and less favourable sites. Ideal for open or plastic sowing, LG31.160 ensures reliable performance in UK conditions and supports early, high-quality harvests.	220	Fav/ Less Fav	7.9	Yield (t/Ha) @15% MC: 9.1	-	-	9	Grain	Redigo M & Korit	50,000 Seeds
 DSV - PETROSCHKA A high-quality AD and forage maize, ideal for very favourable UK sites. This mixed flint/dent variety offers very high starch and dry matter yields, dense dark-green foliage, good early vigour and strong eyespot tolerance. Its stay-green habit and robust growth make it suitable for dairy, bull fattening, and flexible drilling or harvest windows.	230	Very Fav	7	101	31	11.29	7	Forage/AD	Redigo M & Korit	50,000 Seeds
	FAO	Growing Area	End Use		Early Vigour		Stover Dry Down Rate		Pack Size	
N/A PIONEER - P7948 P7948 is a high-yielding forage maize hybrid for favourable sites, delivering very high dry matter yields and good starch content. Large and robust, it shows excellent lodging and eyespot resistance, with strong standing power. Tested over 32 PACTS sites (2021–2024), it outperformed controls and offers exceptional forage gas output, making it ideal for energy-focused silage production.	220	Fav/ Less Fav	Forage/AD/Grain		Very Good		Moderate		50,000 Seeds

UNDERSOWING YOUR MAIZE

BENEFITS

- Soil Retention
- Additional Forage
- Nutrient Retention
- Winter Green Fields
- Better Soil Biology
- Easier travelling

TIMING

Early drilled cover crops - 1st wk June
(Need to be less competitive)
Later drilled options -
2nd to 3rd wk June
(Need rapid establishment)

TIPS

Drill cover crop when maize is at 4-6 leaf stage.
15cm Spacing between cover crop & maize.
Ensure seed to soil contact.

TALK TO US

Get in touch ahead of sowing your maize to secure the right cover crop ready for undersowing in June.
