

Trees and Hedging

Hubbards Seeds can supply you with Trees and Hedging to match your Countryside Stewardship requirements and individual farm needs.

Native British Tree Varieties

All of our trees are native British varieties and are grown and sourced from UK regions directly, to ensure local provenance, greater sustainability and reduced pest risk.

We provide broadleaf trees as well as conifers like Sitka Spruce and Scots Pine Trees sourced from Scotland.

Choosing the right variety for your own location's characteristics and climate is vital for successful tree management and sustainability.

Hedging for Success

We can supply you with bespoke hedging solutions however small or large the length and depth of hedge you wish to plant.

Our hedging packs comprise: 70% Common Hawthorn, 20% Blackthorn, 10% Dog Rose, Guelder Rose, Field Maple, Crab Apple & Common Hazel.

Benefitting the Environment

Trees and hedges bring numerous benefits to the environment, providing:

- Insect Corridors ✓
- Animal habitats ✓
- Flood reduction ✓
- Pollinator nutrition ✓
- Carbon Sequestration ✓
- Oxygen supply ✓
