Professional Advice to Maximise Your Stewardship Income

Need Clarity on Stewardship Schemes?

Payment rates for Countryside Stewardship in England have been increased by up to 30% to attract more farmers in preparation for the move to ELMs, but which ones are right for you?

- **Would you like a better understanding of the different schemes available?**
- **Would you like to know how to make the most of options open to you?**

Here's the Solution...

A free personal farm visit and appraisal from Edward Earnshaw, an independent Professional Stewardship specialist, who can cut through the red tape and clearly guide you through the best opportunities for your own farm, before any commitment.

Edward is a farmer's son with many years of experience in environmental schemes.

He provides farmer-friendly and professional advice, showing you how to maximise your potential income from stewardship.

Following Edward's initial appraisal visit, you will have gained a clear view of how you can maximise your income from the most appropriate schemes and when to apply.

Let us help you make the most of your stewardship opportunities.

If you would like more information or to arrange a free farm appraisal from Edward, please contact Beckii Gibbs or Jo Gunes

at Hubbards Seeds on 01380 729200
